

Child care before Olympics!

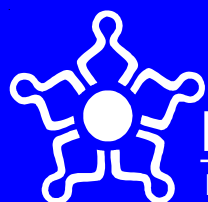

CHILD CARE is not a priority of the Campbell Liberals—it's not even on their radar screen.

They cut child care funding by 40 percent, forcing the closure of some child care centres.

They scrapped before and after school care. Cancelled child care subsidies for many families. And slashed the wages of early childhood educators.

They're creating a system where only the wealthy are able to afford licensed child care... the rest of us are out of luck.

It's time the government showed working families that children are as important as the 2010 Olympics.
